- WIDE RANGE OF SPECIALTY AREAS TO STUDY
- ENGAGING CLASSES WITH PRACTICAL TRAINING EXERCISES
- LIVELY AND CREATIVE CAMPUS EXPERIENCES
Getting started

Going to university is an exciting prospect for everyone involved in the decision because it comes with wonderful hopes, dreams and ambitions. It can also create anxiety, especially if your child is the first in your family to go. After all, it’s a big decision which involves a big commitment, one which needs to be made carefully from a position of thorough knowledge.

This guide has been created specifically to help you help your child make the best possible decision about which university and degree course is suited to their ambitions. It outlines the important questions you need to ask and who you should talk to. It also provides you with answers to some of the most commonly asked questions about the practicalities of going to university.

Now it may seem a bit daunting to begin with, so the best place to start gathering information is with the basics.

Determine your child’s genuine talents and interests.

Although universities specialise in developing knowledge, skills and talents, they need a real foundation on which to build them. So an honest appraisal of your child’s genuine talents and interests is essential in helping them to choose the best university and course.
TALK TO FRIENDS OR FAMILY WHO ARE ALREADY DOING SIMILAR THINGS.

Nothing beats talking to someone who’s already working or studying in your child’s area of interest. This can give you a personal and realistic insight into what to expect. To hear more from UWS students visit youtube.com/universitewesternsydney.

TALK TO CAREERS ADVISORS AT SCHOOL, TAFE AND UNIVERSITY.

You should talk to the careers advisors at your child’s school, because they’re experienced at answering your questions and can provide valuable advice on what’s available out there.

CHECK OUT THE UNIVERSITIES ADMISSIONS CENTRE (UAC) GUIDE.

The UAC Guide will give you a good outline of the various courses provided by universities in NSW and the ACT. All Year 12 school leavers get a UAC Guide from their school (so make sure your child brings it home). If your child isn’t a current school leaver you can buy a UAC Guide at participating newsagents. Alternatively, you can call the UAC Infoline on (02) 9752 0200 or visit uac.edu.au and they’ll send you one.

FIND OUT ABOUT UNIVERSITIES OFFERING COURSES YOUR CHILD MIGHT BE INTERESTED IN.

Collect as much information as you can from all the universities that are offering courses in areas that interest your child. Most universities have information centres you can call or email for a brochure, or visit their websites and download the course info.

At UWS you can contact Team U and speak with current UWS students. Discover what they think of university life and learn their top tips for potential students when you call 1300 897 669, email study@uws.edu.au or visit our website at myfuture.uws.edu.au.

GO TO OPEN DAYS AND INFORMATION NIGHTS AT VARIOUS UNIVERSITIES.

These events are free and an open invitation for you to visit their campus, talk with their staff to get firsthand information about courses and support services, check out their facilities and get a general feel for each place. UWS Campus Experience tours are held throughout the year. To register, visit uws.edu.au/campusexperience or call 1300 897 669. To find out about events at UWS, visit myfuture.uws.edu.au/home/events.

TALK TO THEIR FUTURE EMPLOYERS.

It makes sense to find out what your child’s future employers are looking for in graduates. What sort of qualifications do they need? What kind of work experience should they have? Just as importantly, ask them what the employment and career prospects are like out there, now and in the future.
HOW CAN I TELL WHICH UNIVERSITY IS THE BEST ONE FOR MY CHILD?

Universities are as individual and varied as the people who go to them. They have their own unique strengths and weaknesses, personalities, attributes and characteristics. So it’s important you encourage your child to ask the right questions, in order to find the right fit.

Here are some important questions for your child to ask:

What are the courses like and how do they teach them? It’s a good idea to compare the specific subjects that are actually taught in their preferred course. How are they delivered? How much, if any, practical work is involved? When does it start and how long does it last?

How good are the facilities? Are they appropriate for the course? Are they up to industry standards? How many are available? When do they get to start using them? Are you able to see them for yourself?

What’s the graduate track record like? The success of past graduates is a good indication of what is possible to achieve. Find out about them in university publications such as the UWS University Course Guide and Area of Study brochures. To hear more from past and present UWS students, see youtube.com/uniwesternsydney

How much does it cost to study there? It’s very important to know the total cost of study in order to budget accurately. This should include all course fees, textbooks, personal equipment and parking fees.

Do they provide scholarships? Scholarship opportunities and qualifications vary between universities. At UWS we’ve partnered with business, industry, local government and the community to provide as wide a range of scholarships as possible. For all the details about UWS scholarships, including the eligibility requirements, and how to apply, please visit myfuture.uws.edu.au/scholarships

What about overseas study? Consider the value of international experience. Some universities provide opportunities for students to do part of their course overseas, or take part in student exchange programs.

Is there support if it’s needed? Every student has different needs, at different times. Find out what each university provides in the way of counselling, learning skills assistance, academic preparation programs, bridging classes, disability support, chaplaincy, careers and employment advice and services.

Is it easy to get to? Getting to and from university can add considerable time and cost to your child’s day. It’s important to know how long it will take to get to campus, and how much it will cost. Take into account train or bus fares, parking fees and road tolls. Or if they need to live on campus, find out how much this will cost.

What is campus life like? How a place looks, feels and behaves can affect the learning experience. Every campus has a different atmosphere, and the social life and facilities can vary greatly, so you should check them out to see which ones have the best learning environment. UWS runs guided campus tours for students and parents, so if you’d like to go on one, visit uws.edu.au/campusexperience
HOW CAN I HELP CHOOSE THE BEST COURSE FOR MY CHILD?

The range of course options available is extremely broad, providing hundreds of career paths and professional possibilities. Deciding on the right one can be quite confusing, especially when many young people aren’t sure which career path they would like to pursue.

Our research shows that students who aren’t personally absorbed in their course are more likely to drop out than those who find their course interesting and relevant to their own career goals.

Given that university courses take between three and six years to complete, it’s very important your child chooses a course which is within his or her capabilities and which will sustain their interest over that time.

Encourage them to work it out for themselves. If your child is uncertain about which type of course to do, these are some of the questions you may want to ask, to help narrow down the many options out there.

What kind of career would you like?
Do you want to work indoors or outside? Do you want to work in an office or with your hands? Do you want a practical job or one which uses your imagination? Do you want to work with lots of people or independently?

You can visit pango.edu.au to complete a career match profile.

Which subjects do you enjoy doing at school?
Do you prefer science or art? Studying people, things or places? Which ones stimulate you the most?

What subjects are you good at?
Are you good at them because they’re easy or because you really like them? Which ones make you want to try harder and find out more? Which give you the most satisfaction?

What are your favourite hobbies?
What things do you really love doing outside of school? What activities or interests make you the happiest? What do you enjoy doing that you would still do even if you were not getting paid?

UWS EVENTS

You can help your child find the right course by getting firsthand information from the people who deliver the courses, by coming to one of our on-campus events:

UWS Open Day – Speak directly with academics and course advisors about the various study options available.

UWS Days – UWS courses are showcased through an interactive workshop program. Students should contact their school careers advisor to register their attendance.

Parent Information Days – Designed specifically for parents, these events allow you to speak with University representatives and have all of your questions answered.

UWS Campus Experience – Held throughout the year, these days/events will enable you to discover firsthand the facilities available at UWS. To register, visit uws.edu.au/campusexperience or call 1300 897 669.

Talk to Team U about course information, or anything about university life. Team U consists of current students who make up UWS’ dedicated helpline. You can contact the Team U Advice Centre/ Helpline on 1300 897 669 or email study@uws.edu.au
NOW WE’VE DECIDED, HOW DO WE APPLY?

It’s important your child applies through the right channels to make sure his or her application is properly assessed and processed.

Applications for entry to university undergraduate courses are primarily made through the Universities Admissions Centre (UAC). UAC processes applications on behalf of all participating universities in NSW and the ACT.

Students apply online at uac.edu.au
Note, some universities do accept direct applications.

Year 12 school leavers
When applying for entry into most university courses, year 12 school leavers are considered on the basis of their ATAR or equivalent. Some courses have additional selection criteria such as an interview, audition or portfolio presentation. Please make sure your child reads the UAC Guide carefully, as it contains all the additional instructions for these particular courses.

Non-current school leavers and mature age students
If your son or daughter has been out of school for a while and is a ‘non-current school leaver’ (often referred to as a mature age student) then their application will be based on at least one of the following criteria:

» secondary school result or UAI/ATAR – if applicable
» work experience – must be at least one year full-time, or part-time equivalent, paid employment
» studies that have been undertaken since leaving school. For example, TAFE or UWS College Diploma, and any previous university study such as UniTrack – with a minimum of two subjects
» result in the Special Tertiary Admissions Test (STAT). To find out more about these pathways to university, please visit uws.edu.au/parents

WHAT IS THE ATAR?
The Australian Tertiary Admission Rank (ATAR), formerly the Universities Admission Index (UAI), is a ranking order between 0 and 99.95 which provides a measure of a student’s overall HSC (or equivalent) achievement in relation to that of other students. The ATAR helps universities rank applicants for tertiary selection. The ATAR is a rank, not a mark or percentage.

ATAR cut-offs can differ for different universities, or even different campuses at the same university. The ATAR cut-off is not an indication of the quality of a course or institution or the level of difficulty of a course, it simply reflects the demand and supply for a course. Popular courses tend to have more applicants (which can push up the ATAR cut-offs) so students with higher ATARs are more likely to take up the places. Different courses also allow for varying numbers of students to enter each year. As a result, the larger the course capacity, the lower the ATAR tends to be.

WHAT SCHOLARSHIPS ARE AVAILABLE?
Most universities offer scholarships with eligibility usually based on students’ academic achievements. In addition, the Commonwealth Government provides equity scholarships for students experiencing financial hardship, who have a disability or come from a non-English speaking family. The value of these scholarships can range from a $2,000 one-off payment to as much as $10,000 per year. So it’s important you check out all your child’s options because he or she may well be entitled to receive some form of financial support.
At UWS we offer a unique range of scholarships with many different criteria for eligibility. They reflect our strong commitment to providing academic excellence and higher learning opportunity for students in the Greater Western Sydney region. Our scholarships support students who have diverse interests and skills, and who can and do make an active contribution.

UWS works closely with business, industry, and the community to ensure we offer scholarships which meet the real, practical needs of our students, so they can concentrate more fully on their studies. Our scholarships also provide our students with the opportunity to establish professional relationships while they study, to pave the way for a successful transition from graduate to working professional.

For all the details about UWS scholarships, including the eligibility requirements, and how to apply for them, please visit myfuture.uws.edu.au/scholarships or call us on 1300 897 669 for a copy of the Scholarships Guide.

WHAT OPTIONS ARE AVAILABLE FOR HIGH-ACHIEVING STUDENTS?

The Academy sets UWS apart as a university focused on developing tomorrow’s leaders. UWS aims to provide talented students with first-class academic disciplines, hands-on industry experience, networking opportunities and engagement with our various communities.

Students of The Academy will participate in tailored academic units, workshops and events, work on unique projects and initiatives and have support to bring their ideas to life.

Gifted and high-achieving students are the heart and soul of The Academy at UWS. Students enrolled in an Advanced degree will automatically join The Academy.

For more information about The Academy, scholarships and courses for high-achieving students, visit: theacademy.uws.edu.au

CAN MY CHILD LIVE ON CAMPUS?

Most universities offer some form of student accommodation on campus. It ranges from dormitories and residential halls, fully catered or self-catered shared and single-occupancy rooms to townhouses. So it is likely you’ll be able to find accommodation to suit both your child’s needs and your budget.

UWS offers a wide range of accommodation on each campus, providing students with high-quality, affordable accommodation which offers a rich and balanced living and learning environment.

Furniture including beds, desks, fridges or fully furnished kitchens, lounges and dining areas varies with the accommodation choice. Campus accommodation is the ideal place to relax after a hard day of studying. For further information, visit uwsvillage.com.au

UWS Living Local provides listings for a range of off-campus accommodation options local to each of the six UWS campuses, from rooms to rent in share houses to vacant properties. Visit Living Local at uws.edu.au/livinglocal
HOW MUCH DOES IT COST TO STUDY AT UNIVERSITY?
Most undergraduate places at university have a large part of their cost paid for by the Commonwealth Government, and are referred to as Commonwealth supported places (CSP). There is also a student contribution which needs to be paid by the student, to make up the balance. Students can apply for assistance in paying their student contribution through the Commonwealth Government’s Higher Education Loan Program (HECS-HELP).

If a student applies for this option, the amount of HECS-HELP debt they accumulate depends on which band of study their subjects fall into, and how many subjects are studied in the year. If the student contribution is paid up-front, students may be eligible for a 10% discount on the contribution.

If you need further information or details about course fees and contributions contact the HECS-HELP enquiry line on 1800 020 108 or visit studyassist.gov.au

WHAT SUPPORT SERVICES ARE AVAILABLE FOR MY CHILD?
Most universities understand that the move from high school to university is a huge change for many students, and so they provide a range of support services to help them make that transition as easily as possible. They also provide on-going programs and services to help students develop their learning skills, deal with personal issues, make friends, find careers and generally make their time at university as enjoyable as possible.

At UWS we’re committed to providing all our students with the right support, at the right time, throughout their degree courses. Our many services include:

» Careers and Cooperative Education programs and services connect students and recent graduates with employers.
» University counsellors offer free and confidential guidance to students wanting to talk through, and change, areas of difficulty, conflict or crisis in their lives.
» The UWS Disability Service makes sure students with a disability or chronic health condition get the right help and support they need.
» The UWS Student Learning Unit runs a variety of programs and courses which help develop students’ academic literacy, mathematics and study skills.
» Peer Assisted Study Sessions (PASS) run for a number of units, giving students the opportunity to connect with classmates to work together through challenging coursework.
» UWSConnect provides organised sporting, recreation and leisure activities across all the UWS campuses to help students mix and socialise, and share their university experience with friends and family.

WHAT IF MY CHILD DOESN’T GET A PLACE?
Missing out on a university place can be very disappointing, but it’s neither the end of the world, nor the end of your child’s higher education journey. In fact, for some it can be a blessing in disguise, because it gives them the time to consider more carefully what it is they really want to achieve and how they want to achieve it.

UWSCollege Diploma Courses
UWSCollege Diplomas are the equivalent of a first-year undergraduate university program in the relevant discipline at UWS. The successful completion of the UWSCollege Diploma course guarantees your child entry into the second year of the relevant UWS degree. For example, the successful completion of the Diploma of Engineering Science guarantees entry to the second year of the Bachelor of Engineering Science at UWS.
UWS College offers Diploma courses in the popular fields of Arts, Business and Commerce, Construction Management, Engineering Science, Health Science, Health Science (PDHPE), Information and Communications Technology, Science, Social Science and Social Science (Policing).

**Foundation Studies**
University Foundation Studies are designed to prepare students for university study, both academically and socially, by offering courses which are an introduction to the knowledge and skills needed for an undergraduate degree at UWS. Successful completion of Foundation Studies, at the required level in a relevant stream, offers guaranteed entry to the first year of the relevant UWS degree.

UWS College offers Foundation Studies in five streams: Arts, Business, Computing, Nursing and Science.

More information about Diploma and Foundation Studies programs is available at uwscollege.edu.au

**UniTrack**
UniTrack is an option for your child if they have previously missed out on a place at university and want to make themselves more competitive next time they apply for university entry. UniTrack gives them the opportunity to enrol in individual subjects from a wide range of degrees at UWS. Some of the units have minimum entry requirements, such as an ATAR or subject pre-requisite. Your child can enrol in a maximum of two subjects per semester (six months). This is equivalent to studying part-time. UniTrack does not guarantee a place at university. However, successfully completing two or more subjects can improve your child’s chances of getting in. After completion your son or daughter can then apply again for university through the usual UAC process.

For further information, visit uws.edu.au/unitrack

**TAFE/Vocational Education and Training (VET) Studies**
TAFE provides a wide range of courses which can be used as alternative pathways into university.

UWS has a large number of agreements in place with TAFE and other VET providers which allow graduates from TAFE/VET courses entry to UWS with credit towards their UWS degree.

It may suit your child’s abilities and personality better to study at TAFE or with a private education provider, or to take up an apprenticeship. These are all proven, effective paths to successful working lives, which are always worth considering. After all, you can always apply for university in future years as a ‘non-current school leaver’ or mature age student. For more information on pathways into university, see uws.edu.au/pathways

**HOW WILL MY CHILD BE PREPARED FOR THEIR CAREER?**

At UWS we have many close working relationships with industry, business, government and community project groups in the Greater Western Sydney region. As a result, many of our courses are able to offer students relevant industry placements and real life work experience, so they graduate with a CV as well as a degree, giving them a real edge when applying for positions.

Many of our students are also offered full-time employment before they even graduate because of the working relationships they’ve established during their industry placements.

Our Careers and Cooperative Education services also provide links to industry and internships, as well as access to graduate employers through on-campus careers expos. For more information on the career services available at UWS, see uws.edu.au/careers
The University of Western Sydney is encouraging students to pursue a university education by offering a number of advantages to help them achieve their higher education goals. Students’ ATARs could be boosted by up to 10 Bonus Points.

**EARLY OFFER PROGRAM**

UWS has a new Early Offer Program for 2014. Eligibility for an Early Offer from UWS will be determined by the UWS course or courses that have been listed as a preference through UAC. There are some courses which are not part of the Early Offer Program including:

- B Medicine/B Surgery
- B Medicine/B Surgery/B Arts
- B Health Science (Paramedicine)
- B Health Science/M Physiotherapy
- B Health Science/M Occupational Therapy
- B Health Science/M Podiatric Medicine
- B Midwifery

We will contact eligible applicants with details of the Early Offer Program.

**APPLE IPAD INITIATIVE**

UWS will provide an Apple iPad to all new commencing students in 2014 to support the University’s blended learning model of learning and teaching. UWS is empowering students to engage in learning anytime, anywhere (terms and conditions apply. See uws.edu.au/ipad).

This mobile technology will enable students to engage with the growing number of online services – which will include online lectures, live web streaming of lectures, library services, apps and other tools which aim to provide the best possible learning and university experience. These online and off-campus options will complement face-to-face teaching which will remain core to learning and teaching at UWS.

**REGIONAL BONUS POINTS**

If your child lives or goes to school in Greater Western Sydney and if they are completing the NSW HSC or International Baccalaureate, they will automatically receive 5 Bonus Points when they apply through the Universities Admissions Centre (UAC) to study at UWS.

If they are a non-current school leaver (not completing the HSC or International Baccalaureate at the time of applying to university) and they live in the Greater Western Sydney region, they also automatically receive 5 Bonus Points when they apply through UAC to study at UWS.

Bonus Points apply to all UWS courses excluding those with additional selection criteria such as B Medicine/B Surgery (MBBS), B Medicine/B Surgery/B Arts (MBBS/B Arts) and B Music.

**SUBJECT BONUS POINTS**

UWS rewards outstanding academic achievement of HSC or International Baccalaureate students with up to 10
Subject Bonus Points. Your child must, for example, achieve Band 5 or 6 results in their HSC subjects relevant to the participating UWS course they want to study.

For more information, visit: uws.edu.au/informationabout/uwsadvantage

EDUCATIONAL ACCESS SCHEME (EAS)

This scheme is for UAC applicants who have experienced long-term educational disadvantage as a result of circumstances beyond their control and not of their choosing. UWS awards Bonus Points for students who qualify. An EAS booklet can be downloaded from uac.edu.au/eas

ELITE ATHLETE AND PERFORMER BONUS SCHEME

UWS is recognised as an elite athlete-friendly university and welcomes applications for the Elite Athletes or Performers Scheme. Students who have been disadvantaged during their current or previous year 12 studies due to performance or training commitments are encouraged to apply. UWS awards Bonus Points for students who qualify. An application form can be downloaded from uws.edu.au/admissions
TALK THE TALK

A QUICK AND SIMPLE EXPLANATION OF COMMON UNIVERSITY TERMS

Alternative Pathway/Entry – A way of gaining admission to a university degree, other than by ATAR. This may include alternative study such as TAFE, UWS College or UniTrack.

Assumed Knowledge – A base level of specific knowledge required before beginning a particular degree course. For example, assumed knowledge for a B Science may be HSC chemistry. The course will be taught assuming the student has acquired the specific knowledge.

Australian Tertiary Admission Rank (ATAR) – Formerly the UAI, the ATAR is a rank between 0 and 99.95 based on a student’s HSC performance against all other HSC students in NSW. ACT students also receive an ATAR but don’t sit the HSC.

Bachelor Degree – A first-level university or undergraduate course requiring three to six years of full-time study, or the part-time equivalent. Bachelor is often abbreviated to B – e.g. B Science.

Bonus Points – See UWS Advantage

Bridging Course – Pre-university study programs which help students gain and develop the required skills in certain subject areas, for example, Mathematics, Chemistry and Biology. They’re usually run in the weeks immediately prior to the beginning of the degree course.

Commonwealth Supported Place (CSP) – A university place that is financially subsidised by the Australian Government. Most undergraduate degree places are CSP with students paying a contribution which can be deferred using HECS-HELP. For more information, visit studyassist.gov.au

Combined Degree – Two degrees studied simultaneously and usually completed in four to six years of full-time study, or the part-time equivalent. For example, Bachelor of Arts/Bachelor of Laws.

Deferment – Students who have been offered a place in a course may choose to delay starting their study for a period, usually 12 months.

Education Access Scheme (EAS) – An admission scheme administered by UAC on behalf of universities for students who’ve experienced long-term educational disadvantage, such as disrupted schooling, financial hardship, long-term medical condition or disability.

Elective Units – Bachelor degrees are typically made up of core study units (compulsory), alternate units (chosen from a pool of approved units) and elective units. Elective units can be taken from any discipline and used to specialise within the chosen degree or to diversify a student’s studies. For example, a student studying International Studies may specialise in languages but also take on Science electives.

HECS-HELP – A government loan scheme which allows Commonwealth supported students to defer the payment of their contribution amount.

Honours – An additional period of study (usually one year full-time), which is often research-focused, following the completion of a Bachelor degree. Abbreviation: Hons.

Lectures, Tutorials and Practicals – Students are required to attend a combination of classes, delivered in different ways, for every subject they’re studying in their degree. Lectures are large information sessions attended by everyone enrolled in the subject, usually one to two hours in duration. Students are then divided into smaller tutorials (15-30 students) for more interactive, in-depth exploration of subject matter. Some subjects may also require practical classes which are small, hands-on classes in specialised facilities such as anatomy labs, computer rooms.
and industrial kitchens. Most full-time degrees require between 12 and 20 hours of face-to-face class time per week.

**Major and Sub-Major** – Most degrees require students to select and complete one major which consists of eight to 12 subjects from one discipline. For example, within a Communications degree a student may choose a major in Advertising or Public Relations. Sub-majors generally consist of four subjects from the one discipline other than the major.

**Postgraduate** – May refer to a student continuing or returning to study at university following the completion of an undergraduate degree or the course the student is studying – for example, Master degree. Abbreviation: PG or postgrad.

**Preferences** – Each university course that a student includes on his or her application to UAC, is a preference. Students may have up to nine preferences on their application and should list them in order of personal priority.

**Special Tertiary Admissions Test (STAT)** – STAT is a multiple choice test administered by UAC which is designed to assess a range of competencies commonly considered important for success in tertiary study. STAT provides applicants the opportunity to prove their competency and competitiveness for admission.

**Teaching Session** – Most degrees are taught in two sessions – the Autumn session from March to June and the Spring session from July to November. There’s also an optional Summer session from December to February, during which students can undertake additional subjects if they’re available.

**The Academy** – Unique to UWS, The Academy offers a range of professional and personal development opportunities and internships which offer practical experience. Students enrolled in an Advanced degree automatically join The Academy at UWS. For more information, visit theacademy.edu.au

**UniTrack** – An option for students who have missed out on a place at university and want to become more competitive for university entry next time they apply. It gives them the opportunity to enrol in individual subjects from a wide range of degrees at UWS.

**UWSCollege** – UWSCollege is an affiliate of UWS and offers Foundation and Diploma courses. Successful completion of a UWSCollege Foundation or Diploma course guarantees entry into UWS degrees.

**Universities Admissions Centre (UAC)** – The central body which processes applications for admission to most undergraduate degrees at participating universities in NSW and the ACT. For more information, visit uac.edu.au

**Universities Admission Index (UAI)** See entry for ATAR

**Undergraduate** – May refer to a student studying at university for the first time, or the course the student is studying – for example, Bachelor degree. Abbreviation: UG or undergrad.

**UWS Advantage** – UWS provides three entry advantages to students to achieve their higher education goals. Students may be eligible for one or more of the following:
1. UWS Early Offer Program
2. UWS Regional Bonus Points
3. UWS Subject Bonus Points

For more information, visit uws.edu.au/informationabout/uwsadvantage

**Vocational Education and Training (VET)** – Tertiary study tailored towards developing a skill for the workforce. Most VET courses are offered through TAFE or private colleges, and may be used as an alternative pathway to university.
